## WHAT IS COPY TRADING?

Copy trading is a form of automated trading where individuals, often referred to as "followers" or "copiers," replicate the trades of experienced and successful investors, known as "strategy providers"

It's a social trading method that allows less experienced or time-constrained investors to replicate the trading strategies and actions of more seasoned and successful traders.

## FUND PERFORMANCE

*\*NB: All fees has been deducted from the above Investment Return including the Capital Gain Tax of 15%\**

*\*NB: Past Performance is Not Indicative of Future Results\**

## HOW TO START INVESTING
